**Name of Offeror or Contractor:**

SECTION A - SUPPLEMENTAL INFORMATION  
SECTION A - SUPPLEMENTAL INFORMATION

The purpose of this amendment is to extend the due date from January 21, 2003 (1445 local time) to February 18, 2003 (1445 local time) and to clarify items covered in the Technical Data Package (TDP) and Statement of Work (SOW) (attachment 15).

NOTE: All should be advised that the configuration described bt attachment 15, SOW, take precedence over the configuration specified by TDP.

The following clarifys the most likely questions in the attachment:

- a. The purpose of the exit orifice in the Fuse Housing, 12977376, is to increase the burn pressure of the fuse to compensate for a positive pressure within the Charge case Loading Assembly, 8848485, that occures at elivated temperatures.
- b. The hexagon flange for the Fuse Housing, 12977376, was added to aid in proper installation of the fuse into the Charge Case.
- c. Two critical defects listed in ECP R8Y2003 apply to the flame Shield Assembly and Propelling Charge. The Statement of Work eliminates the Flame Shield Assembly and relocates the propelling charge to the Impulse Cartridge, 12991624. These two related critical defects are superceded by the paragraph 1 (last Sentence) of the Statement of Work (SOW)which states that the propellant height and the Impulse Cartridge's weight are critical defects.

All other terms and conditions of this solicitation remain the same.
